

OUR VISION

Kids Center strives to provide the region's most comprehensive therapy for children with developmental delays and disabilities. Our vision is to constantly improve and innovate, providing the most appropriate and current therapeutic interventions regardless of a family's ability to afford the full cost of care.

OUR MISSION IN ACTION

Born with Partial Trisomy 18 and a rare, unnamed 9th chromosomal defect, Leo M.'s family was concerned he would never walk or talk. After physical, occupational, and speech therapies at Kids Center, Leo took his first steps in December 2017, at the age of two.
